

ABSTRACT OF THE DISCLOSURE

A versatile travel trunk may be reconfigured for numerous purposes, including a men's wardrobe, women's wardrobe, a combined wardrobe, food-carrying applications, tool and utensil accommodation, or any combination thereof. The preferred embodiment includes a body portion to which there is hinged a closable door portion. The body portion has an interior with a depth and opposing inner side walls adapted to receive one or more removable and reconfigurable shelves. A plurality of fasteners are disposed on the back portion of the back wall of the door to receive one or more modular inserts, each insert having a back surface connectable to the fasteners and a front surface with compartments adapted to carry a different set of items for a particular travel application. One or more of the shelves further include lower tracks to receive drawers that slide in and out of the body portion. The body portion preferably further includes a set of integrated wheels and a retractable handle for ease in transport.
